

Unified Revenue Management Solution

Abuja Municipal Area Council (AMAC) — Access Control & Role-Based Privileges Matrix

Document Version: 1.0 | Target Architecture: AMAC Municipal Revenue Engine | Classification: Operational Governance

System Access Architecture: To ensure optimal governance, revenue assurance, and operational efficiency within the Abuja Municipal Area Council (AMAC), Role-Based Access Control (RBAC) is implemented across all operational endpoints. The following matrix outlines the specific functional roles and system privileges assigned to each department and external stakeholder.

AMAC DEPARTMENT / STAKEHOLDER	SYSTEM ROLE	KEY ACCESS RIGHTS & PRIVILEGES
Office of the Executive Chairman	Executive Administrator / Viewer	- Full read-only dashboard visibility across all municipal revenue streams - Real-time analytics, revenue forecasting, and target tracking - Executive report generation and system audit log review - High-level waiver and exception approval workflows
Finance & Account Department	Financial Controller / Super Admin	- Complete financial reconciliation and bank settlement mapping - Treasury integration & automated payment split monitoring - Approval of refund requests, revenue adjustments, and journal entries - Generation of statutory financial statements and audit trails
Chief Revenue Officer (CRO) / Revenue Directorate	Revenue Operations Manager	- System configuration for revenue heads, tariffs, and municipal levies - Generation, authorization, and cryptographic stamping of official Demand Notices - Vendor/Technical Partner quota assignment and receipt book issuance control - Assessment, billing, and taxpayer database management
Technical Partners / Collection Agents	Field Agent / Merchant Admin	- Account creation for assigned enumeration zones and taxpayers - Initiation and issuance of authorized digital Demand Notices - Point-of-Sale (POS) terminal app management and transaction monitoring - Direct cash-less payment link generation (Strictly No Cash Collection)

AMAC DEPARTMENT / STAKEHOLDER	SYSTEM ROLE	KEY ACCESS RIGHTS & PRIVILEGES
Works & Housing Department	Department Admin (Infrastructure & Property)	• Management of tenement rate databases, property tagging, and GIS mapping • Building inspection updates and structural assessment inputs • Issuance of building plan approval fees and infrastructure levy notices
Environment & Sanitation Department	Department Admin (Sanitation)	• Registration and billing for trade waste, commercial premises sanitation, and environmental impact fees • Issuance of health and sanitation clearance certificates upon system payment verification
Health & Human Services Department	Department Admin (Health)	• Assessment and billing for patent medicine licenses, food handler permits, and local health facility registration • Real-time payment verification for health certification workflows
Agriculture & Natural Resources Department	Department Admin (Markets & Trade)	• Management of market stall tariffs, informal sector trade permits, and agricultural movement levies • Deployment of mobile POS apps for market agent collections
AMAC Revenue & Security Task Force / Enforcement	Verification & Enforcement Officer	• Mobile app access for scanning tax receipts, Demand Notices, and QR codes • Real-time compliance verification of business premises, signage, and vehicles • Defaulter flagging, court summons log updates, and premise sealing workflows
Internal Audit Department	System Auditor	• Read-only access to all transaction logs, payment gateway callbacks, and split ratios • Monitoring system anomalies, duplicate receipt detection, and voided transaction histories • Generation of independent compliance and variance reports
Planning, Research & Statistics (PRS)	Data Analyst	• Anonymized spatial and demographic revenue data analytics • Taxpayer expansion mapping and revenue yield forecasting • Exporting statistical reports for municipal planning

Security & Governance Protocols:

To prevent revenue leakages and enforce strict financial accountability, the system restricts the authorization and physical printing of Demand Notices exclusively to the **Chief Revenue Officer (CRO)** role. Field agents, revenue collection vendors, and department officers are strictly limited to system-verified digital generation, automated split payments, and direct POS/bank channel transactions.
